FREE TECHNICAL SUPPORT OPTIONS - SCROLL DOWN FOR MORE INFO

Software updates and support services are provided to all registered users free of charge for the first year following purchase of a NEW System. Users may contact TRIMS Expert Programming and Support Staff through our toll-free telephone number at (800) 608-7467, by email support@trims.com, or by [TRIMS Internet Chat](#) for assistance. Office hours are 8AM to 4PM Arizona Time.

COMPREHENSIVE HELP SYSTEM - Press F1 to Access the TRIMS Help System with step-by-step instructions and screen images. If using Windows 8 or Windows 10, you will need to press the FN Function Key plus F1.

FREE HANDS-ON TRAINING - Using TRIMS Tech Assist and the Internet, the TRIMS Support Technician can provide one-on-one training and live demonstrations of the TRIMS software capability. TRIMS Tech Assist is a standard feature of TRIMS that is provided at no additional charge as part of the TRIMS Annual Support & Update Service.

CHAT WITH A SUPPORT TECHNICIAN - Have a TRIMS Problem or Question that needs a Quick Answer?

Three Distinct Data Sets Delivered Daily

High Resolution Visible Imagery

What your eyes can see...but from 300FT. Our High Resolution visible imagery is the ultimate turf scouting tool. See your entire property at a glance or zoom in to see the details. We provide better than 1 inch resolution. Up to 30 times greater resolution than satellite imagery companies. The details matter. Capture them all with TurfSight.

Greensight NDVI Imagery

Utilizing a ratio of the amount of near infra-red light that a plant reflects, NDVI can be useful in identifying areas of turf that are under stress. Greensight NDVI maps are specially tuned, using advanced computer artificial intelligence and deep learning to specifically highlight areas of turf on your property that appear under stress.

Thermal Imagery

Map the surface temperature of your entire golf course, daily! Our Thermal Imagery highlights areas of your property that are hotter or cooler than average. Spot malfunctioning or poorly adjusted irrigation heads, identify hot-spots, or tune your nights watering cycle. View your imagery in the TurfSight portal or from within Toro Lynx Software.
